SUMMARY

Motivated B.E student specializing in Artificial Intelligence and Machine Learning with strong foundations in programming, web development, and data analysis. Passionate about building efficient solutions using modern technologies and continuously learning new tools. Interested in applying machine learning and software development to create efficient real-world solutions. Seeking internship opportunities to apply machine learning and backend development skills in real-world projects.

EDUCATION

B.E. Computer Science — Current CGPA **8.50**

Sathyabama Institute of Science and Technology, Chennai, India — Expected Graduation **April 2028**

Relevant Coursework: Data Structures, Machine Learning, Web Development, Database Management Systems, Operating Systems.

Programming Languages - Python, Java, C, HTML, CSS, JavaScript.

Tools and Technology - Git, GitHub, VS Code, Canva, MySQL, NumPy, pandas, Scikit-learn, Data Preprocessing

Soft Skills: Problem Solving, Teamwork, Communication, Time Management, Critical Thinking

PROJECTS

Personal Portfolio Website | GitHub: link

- Built a responsive portfolio website using HTML, CSS, and JavaScript to showcase projects and skills
- Enhanced user experience with modern UI design and mobile-responsive layout

AI Driven Train Induction Planning & Scheduling | GitHub: link

- Built an AI-based train scheduling system using Python & OR-Tools, improving allocation efficiency by 30%
- Applied ML-driven decision logic to automate scheduling and improve efficiency
- Enhanced system usability by creating an interactive dashboard using Flask/React for real-time visualization

Event Management System | GitHub: link

- Designed a web-based system for event registration and scheduling
- Executed frontend development using HTML/CSS and backend logic using Java and PHP
- Managed structured data storage using MySQL database

CampusBites – Smart Canteen Management System | GitHub: link

- Developed a full-stack web application to streamline campus canteen operations and reduced waiting time by 40%.
- Implemented online food ordering, queue management, and real-time order tracking for students and staff.
- Expanded system functionality by building backend services using NestJS with MySQL
- Integrated secure online payment functionality to enable seamless cashless transactions

CERTIFICATIONS

- Python Programming – MICROSOFT
- Python for Data Science – NPTEL
- Cybersecurity – TECH MAHINDRA

ACHIEVEMENTS

- Solved 150+ DSA problems across LeetCode & HackerRank
- Participated in inter-college and state-level coding competitions
- Developed multiple real-world projects in AI/ML and web development

ADDITIONAL INFORMATION

Languages: English, Tamil

Interests: Coding, Technology Research, UI Design, Problem Solving, Machine Learning
